STREET NAMING AND ADDRESSING POLICY, GUIDELINES AND PROCEDURES

First edition on November 3, 1994,
amended on February 7, 2002 and amended on November 17, 2020

In collaboration with Road Commission of Kalamazoo County (RCKC), Kalamazoo County Consolidated Dispatch Authority (KCCDA) and the Kalamazoo Metropolitan County Planning Commission (KMCP), please find the street naming and addressing policy, guidelines and procedures.

A. POLICY

1. Preface

As Kalamazoo County develops, the construction of new streets requires new street names and standardized numeric addressing as well as the ability to adjust existing road names and addresses. New streets will likely require new addressing. While the naming of a street or assigning of an address may appear minor in the issues of growth in the County, in actuality, it is an important task in maintaining efficiency and simplicity in today's highly mobile society and public safety. In order to maintain a countywide standard for street names and addressing, the KMCP and partners have created the following policy, guidelines and procedures.

2. Purpose

The purpose of this policy is to establish a coordinated and efficient system in the naming and addressing of all streets in Kalamazoo County. The primary objectives of the policy are as follows:

- a. Confirm clear and easy to pronounce street names.
- b. Conform to a general plan to avoid confusion or duplication of street names.
- c. Establish a simple to understand geographic orientation of street names through the consistent use of certain street name suffixes (i.e., “streets” run north and south, “avenues” run east and west, “courts” are cul-de-sacs, etc.)
- d. Establish proper addressing for consistency in numeric representation.
- e. Provide for essential emergency services, deliveries, etc.

3. Area of Responsibility

The Kalamazoo County Planning & Development Department, on behalf of the KMCP, has been functioning as a central clearinghouse for street name approval for all public and private

streets in the County since the late 1960s. The County provides the service in order to coordinate the issuance of new street names located in all local units of government. County Planning & Development Department will also assist in reviewing for proper addressing.

Approved street names are permanently reserved in the “Kalamazoo County Street Directory” which is maintained by the Kalamazoo County Planning & Development Department.

For roads under the jurisdiction of the RCKC per Public Act (PA) 283 of 1909 section 224.18 “...The board may change the name of the road if it determines that a name change is necessary in order to conform to a general plan or avoid confusion or duplication. The name given by the board to any road under its jurisdiction, either originally or in case of a change as provided for in this section, is the official name by which the road shall be known....”

Roads under the jurisdiction of cities, townships, or villages such as private roads, driveways etc. are subject of review and approval by the respective local government. Kalamazoo County Planning & Development Department, in coordination with RCKC and KCCDA, requests all cities, townships, and villages to use the process outlined herein prior to assigning new or changing existing street/road names and/or addresses.

B. GUIDELINES

These guidelines have been provided for the purpose of assisting in the selection of street names. These guidelines are not requirements for street name approval, however following these guidelines is highly recommended to ensure appropriate databases are updated on a regular basis that assist in providing essential services to the residents and visitors of Kalamazoo County. The guidelines can also be helpful when naming subdivisions or similar developments.

1. **Previous Use.** A street name may refer to the history or previous use of a site or particular area (i.e., farm, school, institution, etc.)
2. **Michigan Living.** The use of names native to Michigan creates an identity for a street or subdivision that characterizes Michigan living. The names also mature better with time than trendy or hard to pronounce names. These names may include names of Michigan wildflowers, historical figures, lighthouses, rivers, counties, etc.
3. **Themes.** The use of a theme is very effective in establishing identity for a subdivision. Airports and famous composers are themes used in two existing subdivisions in Kalamazoo County. The use of an atlas, encyclopedia or directory provides a wide array of potential street names.
4. **Avoid Overused Names.** Common nature names, such as “Meadowbrook” or “Oakridge”, are overused and should be avoided. Look for a name that relates to a special natural feature of the site such as a stand of trees, open prairie, or a marsh or stream. Unique nature names which stick to a theme work well. For example, a development containing open grassland may be named after various prairie grasses or after the native birds, which live in the grassland.

C. STREET NAME REVIEW CRITERIA

1. Street Orientation

The following is a list of accepted street suffixes required for the orientation of a street:

Orientation	Street Suffix
North–South	Street
East–West	Avenue
Cul-de-Sac	Circle, Court, Place, Way
Meander and other	Boulevard, Crescent, Drive, Lane, Parkway, Pass, Path, Road, Terrace, Trace, Trail
Service	Alley

2. Spelling and Pronunciation

- A proposed street name cannot match an existing street of the same name, regardless of spelling or slight variation.
- Sound-a-like or similar names are prohibited.
- Complex or hard to pronounce names are to be avoided.

3. Overuse of Street Names

No two same or similar road names will be approved throughout Kalamazoo County. Proposed street names with the same first word or the same second word as an existing street (i.e., Woodbury, Woodcrest, Woodgrove, Woodhams, Woodhaven or Stonebrook, Mastenbrook, Meadowbrook, Sunnybrook, Springbrook) are prohibited if there are more than five (5) names with the same first word or same second word. If there are less than five (5) names with the same first word or same second word, the proposed street name will only be permitted when the streets are in different local units of government in Kalamazoo County.

4. Name Length

Street name length is limited by the physical constraints of the street name signs. In order to meet letter size requirements specified in the Michigan Manual of Uniform Traffic Control Devices (MMUTCD) a maximum of seventeen (17) characters can fit on a street name sign. This includes prefix, suffix, and spaces.

Generally, the length of street names is to be restricted to eleven (11) letters. This leaves six (6) characters available for prefix, suffix, and spaces.

5. Numbers

No new street name shall use any number (either lettered or numerically) as a prefix name, core name or suffix name, unless it is an extension of an existing road (i.e. 9th Street).

6. Directional Words

No new street name shall use any directional word (north, south, east, west) as a prefix name, core name or suffix name. Directional words may only be used if necessary, to distinguish bearing in accordance with the County street naming convention.

7. Stub Streets

Any street that is not fully extended and therefore a “stub” street, must have a designated street name.

D. STREET NAMING PROCEDURES

1. Applicants for New Streets

The following entities/persons may qualify as applicants for street name approval:

Any public agency or a consultant working for a public agency may qualify as applicant for street name approval.

2. Applicants for Existing Streets

A public agency may qualify as an applicant for proposed name changes to existing streets. All street names should seek recommendation by the Kalamazoo County Planning & Development Department in advance of considering a change. Any proposed name changes must follow local governmental and/or public agency procedures and require their subsequent approval. Any changes requested by the public agency should be provided to the Kalamazoo County Planning & Development Department, in writing, including the previous and new street name(s).

3. Application Process

A detailed e-mail requesting the new street or change to the existing street name(s) should be sent to plngis@kalcouny.com. The email shall include a description of the request and a map/shapefile or a copy of a plat/site condominium/land division.

It is highly recommended that at least two names for each street be submitted in the event of duplication and in an effort to expedite the approval process. The map/shapefile or copy of the plat must indicate the location of the street, including municipality, township section, plat name (if applicable), location to nearest major cross streets and any other information which will provide an accurate location of the street.

Once received, the Kalamazoo County Planning & Development Department will circulate the request to RCKC and KCCDA for evaluation and input. After feedback is received from RCKC and KCCDA, Kalamazoo County Planning & Development will prepare a letter of recommendation to the respective entity either accepting or rejecting the requested new or changed street name taking into consideration input from applicable public agencies. The process, under normative circumstances, takes approximately FOURTEEN (14) business days from the date the application is received.

4. Letter of Recommendation

A letter of recommendation from the Kalamazoo County Planning & Development Department will be emailed to the applicant or requesting public agency. Copies of the street name recommendation letter will be emailed to the Clerk of the respective local unit of government (unless another designee is specified by the local unit), KCCDA, the RCKC, the County GIS Coordinator and the U.S. Post Office. Once a letter of recommendation is received, final approval will be required by the municipality with jurisdiction of the street.

E. ADDRESS NUMBERING SYSTEMS/CRITERIA

1. Address Numbering System

The countywide address numbering system was adopted by the County Board of Supervisors on January 16, 1948. The address numbering system, which is structured as follows, shall generally be used except when other existing municipal systems are more appropriate.

The numbering of houses in the various townships on a countywide basis (excluding Kalamazoo Township and the various cities), are set up on a system using 1,000 numbers to the mile. The exceptions are the townships bordering on or in a line with Kalamazoo Township, which are numbered to correspond with Kalamazoo Township as follows:

Cooper and Schoolcraft Townships and the City of Portage have 1,600 numbers east and west, and 1,000 numbers north and south to the mile; Oshtemo, Comstock and Charleston Townships have 1,600 numbers north and south, and 1,000 numbers east and west to the mile.

Explanation: Houses are numbered north and south starting from a zero point approximately on a center line running through the center of the Townships of Oshtemo, Cooper and Charleston (the “baseline”). Houses are numbered east and west from zero point approximately on a center line running through the center of Cooper and Schoolcraft Townships and the City of Portage (the “meridian”), using a nominal 1,600 numbers to the mile for the first three miles, but not to exceed 5,000 in any three miles.

The numbering shall be uniform, with no duplication of numbers in municipal and township areas, and the system shall be applied to eliminate confusion.

2. Even and Odd Address Numbers on a North-South Road

Even and odd address numbers for north-south roads are defined as follows:

- a. North of the baseline, even numbers shall be on the easterly side of roads, odd numbers shall be on the westerly sides of roads.
- b. South of the baseline, even numbers shall be on the westerly side of the roads; odd numbers shall be on the easterly side of the roads.
- c. Roads which are not aligned due north-south or meander shall be numbered as a north-south roads if the major portion of the road within Kalamazoo County runs north-south.
- d. Once a north-south road has address numbers assigned to buildings, then that road shall always be considered to be a north-south road.

3. Even and Odd Address Numbers on an East-West Road

Even and odd address numbers for east-west roads are defined as follows.

- a. East of the meridian, even numbers shall be on the southerly sides of roads, odd numbers shall be on the northerly sides of roads.
- b. West of the meridian, even number shall be on the northerly sides of the roads, odd numbers shall be on southerly sides of the roads.
- c. Roads which are not traveling due east-west or meander shall be numbered as an east-west road if the major portion of the road with Kalamazoo County runs east-west.
- d. Once an east-west road has address numbers assigned to buildings then that road shall always be considered to be an east-west road.

F. ADDRESSING PROCEDURES

1. Area of Responsibility

Administration of the addressing numbering system and issuing new addresses is the responsibility of each city, township, and village.

2. Process for Issuing a New Address

A detailed email regarding new addresses being issued should be sent by the responsible unit to plngis@kalcounty.com. The email shall include a description of the request, i.e. proposed address number(s), street name, ZIP code and a map/shapefile or a copy of a plat/site condominium/land division. The map/shapefile or copy of the plat must indicate the location of the street, including municipality, township section, plat name (if applicable), location to nearest major cross streets and any other information which will provide an accurate location of the street being addressed.

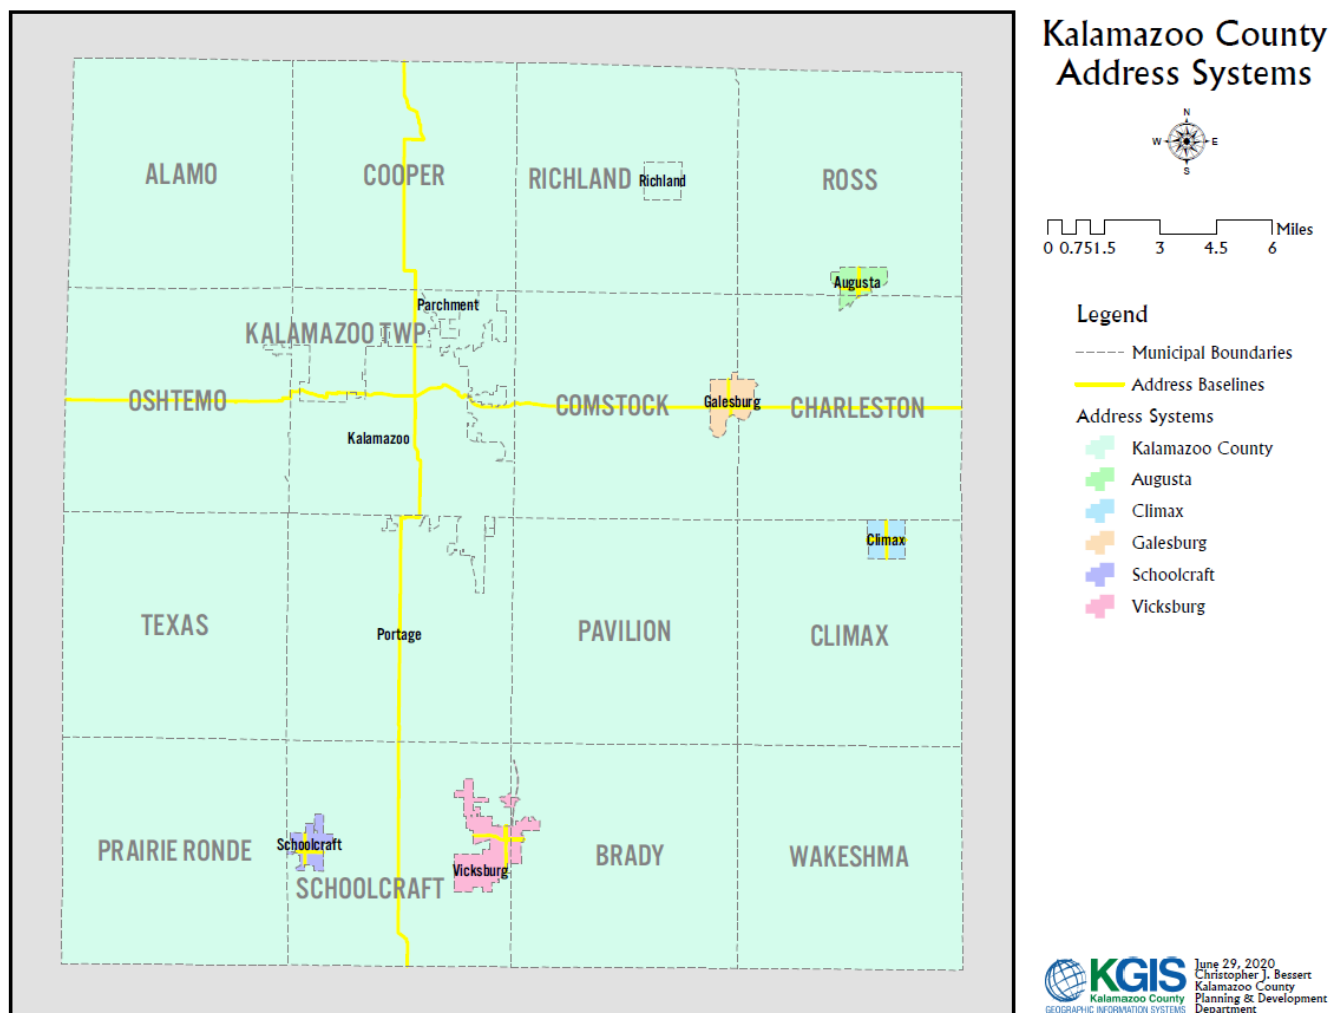

Once received, the Kalamazoo County Planning & Development Department will circulate the address request to KCCDA for evaluation and input. After feedback is received from KCCDA, Kalamazoo County Planning & Development Department will prepare a letter of recommendation

to the respective entity either accepting or rejecting the proposed addresses taking into consideration the input from applicable public agencies. The process, under normative circumstances, takes approximately FOURTEEN (14) business days.

3. Letter of Recommendation

A letter of recommendation from the Kalamazoo County Planning & Development Department will be emailed to the requesting municipality. Copies of the address recommendation letter will be emailed to the Clerk of the respective local unit of government (unless another designee is specified by the local unit), KCCDA, the County GIS Coordinator and the U.S Post Office. Once a letter is received, final approval will be required by the municipality responsible for issuing the addresses.

The following Kalamazoo County Address Systems map is provided to assist with the addressing systems:

KALAMAZOO COUNTY STREET NAMING DIRECTORY & USER GUIDE

The format of this directory is easy to understand. Starting at the left hand and moving across the top of each directory page, each field is described below:

- **DIR** – indicates the direction in which the street runs (i.e., “N” = North).
- **STREET NAME & SUFFIX** – provide the street name and the street suffix (i.e., “DRAKE” = name, “RD” = Suffix)
- **LO, HI** – these are the address range fields showing the range of house address numbers for that portion of the street, indicating the low (“LO”) and high (“HI”) address values for that street
- **OE*** - indicates if the address range contains all house numbers, only even numbers or only odd numbers. “E” indicates even numbers only, “O” indicates odd numbers only, and the asterisk (“*”) indicates all numbers, even and odd.
- **MUNICIPALITY & C/T/V** – indicate which local unit of government the street is located within. For example, a street in Kalamazoo Twp. will be “KALAMAZOO” and “TWP”, while a street within the City of Kalamazoo will read “KALAMAZOO” and “CITY,” respectively.
- **ZIP** – shows the ZIP Code covering that portion of the street.
- **TRACT** – indicates the 2000 Census Tract covering that portion of the street.
- **LOCATION** – provides a description of the street, often to the nearest major roads.

ERRORS AND OMISSIONS

The Kalamazoo County Planning & Development Department is providing this directory for informational purposes only and is not responsible for any errors or omissions. If you are using this directory and find an error or omission, please contact the Kalamazoo County Planning & Development Department at (269) 384-8112 or plngis@kalcounty.com, so that we may make the appropriate corrections.

Through the assistance of the local units of government in Kalamazoo County and you, the user, we make every effort to ensure the street directory is up to date and accurate. Thank you for your cooperation.
